Dementia

Nutrition

1. Abbasi MM, Khandae S, Shahabi M, et al. [Association between the DASH diet and Alzheimer's disease in a case-control study](#). *Sci. rep.* 2025; 15(1): 23312.
2. Blotenberg I, Zulke AE, Lupp M, et al. [Factors associated with a healthy diet and willingness to change dietary behavior in older adults at increased risk of dementia](#). *J Alzheimers Dis.* 2025; 105(2): 634-645.

3. Chatzispirellis S, Fragopoulou E, Mamalaki E, et al. [Polyphenol Intake and Risk of Dementia and Cognitive Decline in Older Adults: Principal Component Analysis Approach](#). *J Nutr*. 2025; 155(7): 2089.
4. Na J, Yang C, Na M, et al. [Association between sulfur microbial diet and the risk of dementia: a large-scale prospective cohort study](#). *Nutrition Journal*. 2025; 24(1): 1-14.
5. Samuelsson J, Glans I, Stubbendorff A, Ericson U, Palmqvist S, Hansson O & Sonestedt E. [Associations between the eat-lancet planetary health diet and incident dementia](#). *Jpad*, 2025; 12(6): 100166.

Cognitive Function

1. Campos-Gutierrez JA, De Leon-Gonzalez ED, Gutierrez Hermosillo H, et al. [Handgrip Strength, Depression, Dementia, Cognitive Function, and Their Predictive Effect on Functional Independence in Older Adults](#). *Medicina (Kaunas)*. 2025; 61(6): no pagination.
2. Hao Y, Zhao Y, Luo H, Xie L, Hu H, Sun C. [Comparative effectiveness of different dual task mode interventions on cognitive function in older adults with mild cognitive impairment or dementia: a systematic review and network meta-analysis](#). *Aging Clin Exp Res*. 2025; 37(1): 139.
3. Li Y, Li Y, Gu X, et al. [Long-Term Intake of Red Meat in Relation to Dementia Risk and Cognitive Function in US Adults](#). *Neurology*. 2025; 104(3): e210286.
4. Melgarejo JD, Patil D, Charisis S, et al. [Baseline associations of office and ambulatory blood pressure monitoring with cognitive function and dementia prevalence](#). *J Alzheimers Dis*. 2025; 104(4): 1064-1074.
5. Octary T, Fajarini M, Arifin H, et al. [Multisensory stimulation reduces neuropsychiatric symptoms and enhances cognitive function in older adults with dementia: A meta-analysis of randomized controlled trials](#). *JPAD*. 2025; 12(5): 100091.
6. Weng WH, Yeh NC, Yang YR, Wang RY. [Effects of motor-cognitive training on cognitive function and gait performance in older adults with dementia: a systematic review and meta-analysis](#). *Sci. rep*. 2025; 15(1): 24915.
7. Yang F, Zheng J, Liu S, et al. [Increasing dementia diagnostic workup participation among at-risk Chinese older adults via risk communication: A quasi-experiment](#). *Geriatr Nurs*. 2025; 64: 103432.

Medicines

1. Alhumaid S, Bezabhe WM, Williams M, Peterson GM. [Ten-Year Trend in the Potentially Inappropriate Prescribing of Renally-Dependent Medicines in Australian General Practice Patients with Dementia](#). *J. Clin. Med.* 2025; 14(13).
2. Araki A. [Mechanism for the association between diabetes or anti-diabetic medications and incident dementia...Gutierrez-Hermosillo H, de Leon-Gonzalez ED, et al, Diabetes treatment: beyond glycemia](#). *Geriatrics and Gerontology International*, 2025; 25(1): 132–133.
3. Coe AB, Martindale J, Bynum JPW. [Receipt of Medicare Part D comprehensive medication reviews in older adults with dementia](#). *J Manag Care Spec Pharm.* 2025; 31(3): 296-305.
4. Mehnaz, Shamsi Y, Akhtar MW, Rahman Y. [Therapeutics for Dementia and Alzheimer's Disease in Unani Medicine](#). *Alternative Therapies in Health & Medicine.* 2025; 31(4): 188-192.
5. Weidmann AE, Matthiasdottir R, Proppe GB, Tadic I, Gunnarsson PS, Jonsdottir F. [Medication Causes and Treatment of Delirium in Patients With and Without Dementia](#). *Brain Behav.* 2025; 15(7): e70706.

Activity 12

1. Boyle NR, Fox SN, Tadepalli AS, et al. [Reduction of sphingomyelinase activity associated with progranulin deficiency and frontotemporal dementia](#). *Neurobiol Dis.* 2025; 213: 107024.
2. Britt KC, Richards KC, Hamilton J, Radhakrishnan K. [Symptoms of Dementia Progression in Cognitive Impairment: The Role of Religious and Spiritual Activity](#). *J. spiritual. ment. health.* 2025; 27(2): 309-328.
3. Crabtree S, Baker FA, Bukowska AA, et al. [Exploring the use of musical activities implemented in home-based dementia care as part of the HOMESIDE study](#). *Arts health.* 2025; 1-18.

4. Hill K, Den-Ching Angel Lee. [Changing the Focus - Increasing Physical Activity for People Living with Dementia](#). *Australian Journal of Dementia Care*. 2025; 14(3): 35-37.
5. Kambampati H, Berry D, Doyle J, et al. [Indoor and Outdoor Mobility Monitoring for People Living with Dementia: Improving Their Independent Activity by Integrating Open Interface Sensors...23rd International Conference on Informatics, Management and Technology in Healthcare \(ICIMTH 2025\)](#), 2025: July.
6. Li J, Szanton SL, Li J. [Latent cognitive profiles and their associations with instrumental activities of daily living among older adults without dementia: A United States national cross-sectional study](#). *JPAD*. 2025; 12(6): 100162.
7. Milton S, Cavailles C, Ancoli-Israel S, Stone KL, Yaffe K, Leng Y. [Five-Year Changes in 24-Hour Sleep-Wake Activity and Dementia Risk in Oldest Old Women](#). *Neurology*. 2025; 104(8): e213403.
8. Munk S, Smyth A, Toohey R, Remtilla A, Bail K. [The Use of Digital Reminiscence Activities to Support Person-Centred Dementia Care](#). *Australian Journal of Dementia Care*. 2025; 14(3): 28-29.
9. Quick SM, Lawler K. [Effective Physiotherapy Practice for Dementia](#). *Australian Journal of Dementia Care*. 2025; 14(3): 16-19.
10. Seok JW, Cho AY, Lee JY, Lee H, Lee KH. [Cognitive Function, Physical Activity, and Sweat Cytokines in Older Adults With Dementia](#). *Nurs Res*. 2025: no pagination.
11. Wanigatunga AA, Dong Y, Jin M, et al. [Moderate-to-Vigorous Physical Activity at any Dose Reduces All-Cause Dementia Risk Regardless of Frailty Status](#). *J AM MED DIR ASSOC*. 2025; 26(3): 105456.
12. Whitney RL, Bell JF, Ogugu E, et al. [Caregiving Activities and Outcomes Among Family Caregivers of Individuals With and Without Parkinson's Disease and Lewy Body Dementia in California Caregiver Resource Centers](#). *Research in Gerontological Nursing*. 2025; 18(4): 168-179.
13. Zhu S, Resnick B, Boltz M, et al. [A Cross-Lagged Panel Model Testing the Impact of Physical Activity During Hospitalization on 1- and 6-Month Discharge Physical Activity and Adverse Events Among Older Adults With Dementia](#). *J AM MED DIR ASSOC*. . 2025;105767.

Early Onset

1. Gallee J, Gibbons LE, Choi SE, et al. [Facets of language performance in early-onset and late-onset Alzheimer's disease dementia](#). *medRxiv*. 2025: no pagination.
2. Kruger J, Katisko K, Aaltonen M, Solje E. [Author Response: Incidence and Prevalence of Early-Onset Dementia in Finland](#). *Neurology*. 2025; 105(3): e213325.
3. Sepulveda-Falla D, Villegas Lanau CA, White Iii C, et al. [Comorbidities in early-onset sporadic versus presenilin-1 mutation-associated Alzheimer disease dementia: Evidence for dependency on Alzheimer disease neuropathological changes](#). *J Neuropathol Exp Neurol*. 2025; 84(2): 104-113.
4. Vandaele LL, van Eersel MEA, Koopmans RTCM. [Palliative Care Needs in Young-Onset Dementia: A Commentary](#). *Journal of the American Medical Directors Association*. 2025; 26(7): no pagination.
